### THE BRIDGE SOLUTION

**Works with Existing Systems**

Does not interfere with existing TITO system or AFT. Bridge does not require PIP technology or button remapping.

Leverages the Bitcoin SV public blockchain and is fully transparent and auditable in real time.

**Reduced IT Costs**

**Hand Pays**

Reduce the resource costs for processing hand pays by enabling players to perform KYC and tax documentation within the mobile app, which also significantly improves the player experience winning a jackpot.

Players can pre-load their Bridge wallet before arriving at the casino or from the cage. Players can send credits to a slot machine and cash out, all from the smartphone that they are already constantly using.

**Player Convenience**

### The Mobile Ecosystem

Easily Transition Player to Online Gaming and Sportsbook

Use Digital Tokens for Promotional Giveaways

Stay in Constant Marketing Contact with Players

Keep the Player Spending At Your Property

Increase Player Loyalty

Controlled Spend - Can Restrict Token Usage
